

SAVE ENERGY NOW IN APARTMENTS WITH GAS HEATING

Dear tenants,

Wohnbau Stadt Coburg (WSCO) would like to act in the interests of the environment and climate protection. Especially in view of the limited availability of gas and the expected increase in heating costs, we as your landlord see a need for action in the short term.

In the next few days, we will turn off our gas heating systems centrally and temporarily until probably September in order to save energy.

The hot water supply will ALWAYS be guaranteed and there will be no restrictions on showering or bathing.

The specified minimum temperatures will not be undercut. The heating system will be put back into operation when the indoor temperature of the rooms drop to 18 degrees and the set point of 20 degrees cannot be expected in the next one or two days.

Thank you for your understanding!

Your WSCO
